ON THE TOPIC OF CYBERCHEF

It has been brought to our attention that a highly sophisticated hacking tool known as CyberChef can decrypt our base64-encoded recipes. As a mitigation, all recipes have been additionally encrypted with ROT47, like the following:

***>}_+?E')a|_%=h<|uh&\$suK)_hF)b4H4>#7+vh;4`h&|thh**

Please continue to cook as usual.
